

**Bulletin #2008-012      4 – November - 2008**

Subject:  
Open Light Class

Overview:

Effective January 1, 2009, the following rule changes go into effect.

1. Add Article 10.2.B.10 as follows:
  10. Open Light Class: Vehicles must be AWD, normally-aspirated models sold globally in minimum quantities of 1000. The maximum displacement is 2650cc for overhead cam engines and 3313cc for pushrod engines.
2. Replace Article 3.1.5 with the following:
  5. All vehicles competing in the Super Production, Production GT, Production, Open Light, Group 2 or Group 5 classes will be so designated by the placement of a decal containing the letter(s) "SP" (Super Production), "GT" (Production GT), "P" (Production/RallyTruck), "L" (Open Light), "G2" (Group 2) or "G5" (Group 5). Open class vehicles do not use class ID.  
Placement of this class identification will be as described in Article 3.1.B.1 or 3.1.C.2.
3. Replace Article 8.2.C.11 with the following:
  11. SP, GT, P, L, G2 and G5 class cars without proper class identification will be scored as Open class.
4. In the table under Article 10.1, add "Open Light" to the list of classes associated with Open Category.

Rationale: This new regional-only class is intended to provide a competitive class for lower cost AWD vehicles.

Questions regarding this bulletin received by Rally America from licensed Drivers and Co-Drivers will be answered in writing.
